

Coastal IVF Fertility Services

WHAT MAKES US DIFFERENT?

Reliable Outcomes

For all patients undergoing IVF cycles at Coastal IVF in 2019 - treatment at our clinic now comes with a guarantee.

What is the guarantee?

If there is not a viable pregnancy on the first stimulated IVF cycle, you will be guaranteed no out of pocket cycle costs on a second subsequent IVF cycle at Coastal IVF.

Explanatory Notes / Terms and Conditions

- Viable pregnancy means an ongoing pregnancy confirmed by ultrasound after 6-7 weeks gestational age
- The guarantee is for the subsequent treatment cycle only.
- The subsequent IVF treatment cycle must be commenced within 6 months of the starting date of the initial treatment cycle.
- No out of pocket cycle costs means all costs after Medicare, Health Fund and Safety Net Rebates.
- This excludes: donor cycles, genetic testing, anaesthetic or theatre fees etc or any other services not provided by Coastal IVF.

What else is new?

- Our new Embryoscope with time-lapse recording allows us to continually monitor embryos while they grow in an undisturbed environment before selecting the best embryo for transfer. We are the only clinic north of Brisbane to have this state-of-the-art equipment and only the 11th in Australia. In the field of IVF, the Embryoscope is considered to be one of the major significant advances for decades.
- Donor Oocyte and Donor Sperm Program. We now partner with Manor IVF to provide oocytes and sperm to patients. We are one of the largest donor sperm programs in the state.
- We do not treat patients with a 'one size fits all' plan. Patients cycles are safely managed by a private clinician and care is customized depending on the patient's need for fertility treatment.
- We guarantee patients will not have IVF if they do not require it.
- We now offer interest free payment plans through ZipMoney.
