

OUR IVF GUARANTEE

We're so confident in our team & our outcomes that

IVF treatment at our clinic now
comes with a guarantee.

If there is not a viable pregnancy on the first stimulated IVF cycle, you will be guaranteed no out of pocket costs on your subsequent cycle.

We guarantee you will not have IVF if you don't need it. Often with a proper diagnosis your infertility can be treated less intensively!

You won't be treated with a 'one size fits all' plan. Your treatment is safely managed by a private clinician and care is customized to your needs.

You won't find this elsewhere!

Terms & Explanation

- Viable pregnancy means an ongoing pregnancy confirmed by ultrasound after 6-7 weeks gestational age.
- The guarantee is for the subsequent treatment cycle only.
- The subsequent treatment cycle must be commenced within 6 months of the starting date of the initial treatment cycle.
- No out of pocket cycle costs means all costs after Medicare, Health Fund and Safety Net Rebates.
- This excludes: donor cycles, genetic testing, anaesthetic or theatre fees etc or any other services not provided by Coastal IVF.
- Should the guarantee cycle roll into a new calendar year, there is the possibility that a small gap may be payable due to the changes in the Medicare safety net rebate at the start of each new calendar year.
